RE: Tampa Roofing Company

To Whom It May Concern:

I was asked by Keith Swope from Tampa Roofing Company to explain the situation that existed with my roof on the home I formerly owned in the Tampa Palms Community of New Tampa. Before Mr. Swope's company Tampa Roofing came to the rescue, my roof tiles were slipping, the flashing around my chimney was leaking so badly that the chimney had to completely be rebuilt and re-stuccoed. My skylight flashing and valley was leaking so badly that it became necessary to rebuild a lot of the rafters and re-sheet most of the back of the house. Also, understand that every home in my entire neighborhood had similar tile roofs and most every home was experiencing problems with roof tiles that were slipping and had additional damage due to leaks like the type I experienced.

Tampa Roofing Company used an installation system that the company had used with great success for many years. Once Tampa Roofing completed my job, all my problems were rectified and I no longer had any problems with leaks or slipping tiles.

Most importantly, I would recommend Tampa Roofing Company to anyone who needed a new roof installed. Keith Swope, his on the job supervisors and other employees were professional and polite. I personally took the time to check out the company and Mr. Swope before doing business with him and got wonderful reviews from numerous prior customers. And after my experience with the job they did for me, I hope to be added to the long list of prior customers willing to strongly recommend them for future projects.
